<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Sound sources in a vehicle . . . . .	2
1.1.1	Powertrain . . . . .	2
1.1.2	Tire-road contact . . . . .	3
1.1.3	Other sound sources . . . . .	3
1.1.4	Relevance and meaning of vehicle sounds . . . . .	3
1.2	Sound engineering methods . . . . .	5
1.2.1	Interior noise measurements . . . . .	5
1.2.2	Decoupling method . . . . .	6
1.2.3	Excitation signal analysis . . . . .	6
1.3	Transfer path analysis and synthesis . . . . .	7
1.3.1	Source-transmission-receiver model . . . . .	8
1.3.2	Transfer paths . . . . .	8
1.3.3	Input signals . . . . .	10
1.3.4	Performing TPA . . . . .	11
1.3.5	Transfer path synthesis . . . . .	14
1.3.6	Contribution analysis . . . . .	15
1.3.7	Frequency or time domain TPA . . . . .	15
1.4	Panel contribution analysis . . . . .	16
1.5	Objectives . . . . .	18
<b>2</b>	<b>Fundamentals of transfer path analysis</b>	<b>21</b>
2.1	Structure-borne sound transfer path analysis . . . . .	22
2.1.1	Applications for structure-borne TPA . . . . .	22
2.1.2	Substructuring . . . . .	22
2.1.3	Mechanical impedance and mobility . . . . .	23
2.1.4	Electromechanical analogies . . . . .	23
2.1.5	Coupling between source and receiver . . . . .	24
2.1.6	Structure-borne transfer path model . . . . .	25
2.2	Auralization using acoustic transfer functions . . . . .	26
2.2.1	Reciprocal measurement of acoustic transfer functions . . . . .	26
2.2.2	Auralization based on active-side accelerations . . . . .	27
2.3	Direct force measurement . . . . .	28

2.4	Inverse force method based on mobility FRFs . . . . .	29
2.4.1	Inertance FRF measurements . . . . .	30
2.4.2	Derivation of inverse force identification method . . . . .	31
2.4.3	Regularization . . . . .	36
2.4.4	In-situ inverse force identification . . . . .	37
2.5	Two-port model . . . . .	38
2.6	Mount stiffness method . . . . .	39
2.7	Mount attenuation function method . . . . .	40
2.7.1	Derivation of mount attenuation function method . . . . .	40
2.8	Transmissibility method - Operational transfer path analysis . . . . .	42
2.8.1	Multiple-input-multiple-output model . . . . .	43
2.8.2	Derivation of OTPA . . . . .	44
2.9	Model based approaches . . . . .	45
2.10	Discussion . . . . .	46
<b>3</b>	<b>Engine TPA - Parameterizing mount models based on in-situ measurements</b>	<b>49</b>
3.1	Effective mount transfer function method . . . . .	50
3.2	Physically motivated parameter models . . . . .	57
3.2.1	Kelvin-Voigt model . . . . .	57
3.2.2	Kelvin-Voigt model with mass . . . . .	60
3.3	Physically motivated models considering directional coupling within a mount . . . . .	61
3.3.1	Considering directional coupling . . . . .	61
3.3.2	Kelvin-Voigt models . . . . .	62
3.4	Modeling of non-linear mounts . . . . .	65
3.5	Avoiding auralization artifacts . . . . .	66
3.5.1	Methods reducing auralization artifacts . . . . .	66
3.5.2	Example . . . . .	69
3.6	Transfer path synthesis based on engine test rig data . . . . .	73
3.6.1	Motivation . . . . .	73
3.6.2	Acceleration ratio based on reference measurements as correction function . . . . .	73
3.6.3	Impedance based method . . . . .	77
<b>4</b>	<b>Results of engine TPA methods</b>	<b>81</b>
4.1	Effective mount transfer function method . . . . .	82
4.1.1	Comparison of structure-borne TPA methods . . . . .	82
4.1.2	Influence of tire-road excitations on synthesized engine structure-borne noise . . . . .	84
4.2	Parametric mount models . . . . .	86
4.2.1	Example Kelvin-Voigt model . . . . .	86

4.2.2	Stiffness parameter estimation . . . . .	87
4.2.3	Engine mounts 3D Kelvin-Voigt model . . . . .	88
4.2.4	Suspension mounts 3D Kelvin-Voigt model . . . . .	89
4.3	Transfer path synthesis based on engine test rig data . . . . .	92
4.4	Summary on engine TPA . . . . .	99
<b>5</b>	<b>Chassis TPA - Tire-road noise analysis</b>	<b>103</b>
5.1	Auralization of tire-road noise . . . . .	104
5.2	Data acquisition . . . . .	105
5.3	Analysis of coast-down measurements . . . . .	106
5.4	Tire-road noise under dynamic driving conditions . . . . .	107
5.4.1	Motivation . . . . .	107
5.4.2	Cross-talk cancellation (CTC) . . . . .	108
<b>6</b>	<b>Results of chassis TPA methods</b>	<b>113</b>
6.1	Sound shares of the tire-road noise . . . . .	113
6.1.1	Coast-down . . . . .	113
6.1.2	Dynamic driving conditions . . . . .	116
6.2	Comparison of OTPA and conventional chassis TPA . . . . .	124
6.3	Comparison of direct force measurement with indirect force determination . . . . .	127
<b>7</b>	<b>Conclusions and outlook</b>	<b>131</b>
	<b>Nomenclature</b>	<b>139</b>
	<b>Bibliography</b>	<b>145</b>
