Introduction	1
I. Quiver representations	5
1. Finite representations of a kind of hypercube quiver	7
1.1. Definitions and basic properties	7
1.2. An equivalence of categories	11
II. Regular singular \mathcal{D}-modules in \mathbb{C}^n whose singular locus is a normal crossing	19
2. Quiver \mathcal{D}-modules in \mathbb{C}^n whose singular locus is a normal crossing	21
2.1. Definitions and basic properties	21
2.2. Connection to the quiver \mathcal{D} -modules of Khoroshkin and Varchenko	26
3. The 1-dimensional case	31
3.1. Quiver \mathcal{D} -modules, V-filtration and the Riemann-Hilbert correspondence	31
3.2. A complete list of examples	38
4. The general case	51
4.1. Properties of $\mathcal{O}_{I,0}$	54
4.2. Main theorem	57
Bibliography	76
