List of Figures	III
List of Algorithms	IV
1 Introduction	1
1.1 Motivation	1
1.2 Objectives	2
1.3 Organization	5
2 Introduction to Discrete Event Systems	7
2.1 Notations	7
2.2 Automata	7
2.3 Petri nets	8
2.4 System	11
2.5 Case study: Laboratory manufacturing system	11
3 Stealthy Cyber Attacks on Discrete Event Systems	13
3.1 Attack model	16
3.2 Replay attack	17
3.3 Covert attack	18
3.4 False data injection attack	20
3.5 Malicious action injection attack	22
3.6 Example	24
3.7 Discussion	26
4 Encrypted Control	27
4.1 Homomorphic encryption	30
4.2 Encryption of SIPN	32
4.3 Encrypted counters and timer for DES	37
4.4 Encrypted controller	44
4.5 Extensions	48
4.6 Example	51
4.7 Discussion	56
5 Attack Detection and Attack Localization	59

5.1	Analysis of weak points of cyber attacks	61
5.2	Attack detection	62
5.3	Attack localization	67
5.4	Constraints	73
5.5	Design of permutation matrices with AND-constraints	76
5.6	Design of permutation matrices with OR-constraints and OR-AND-constraints	82
5.7	Time-varying permutation	85
5.8	Example	88
5.9	Discussion	94
6	Tracking Control of Petri Nets with Monte-Carlo Tree Search	97
6.1	Basics of Monte-Carlo Tree Search	100
6.2	Monte-Carlo Tree Search for untimed Petri nets	101
6.3	Monte-Carlo Tree Search for timed Petri nets	114
6.4	Monte-Carlo Tree Search for signal interpreted Petri nets	129
6.5	Handling of undesired behavior	145
6.6	Attack recovery	147
6.7	Example	148
6.8	Discussion	153
7	Conclusion	155
7.1	Summary	155
7.2	Outlook	157
8	Extended Summary in German	159
A	Notation	165
B	Acronyms	169
C	List of Publications	171
	Bibliography	172
